

SECURITY PERFORMANCE MANAGEMENT

Peer Comparison

Know how your security program performance stacks up

Empowering Cybersecurity Governance and Disclosures

Do you have a clear vision of what 'good' means when it comes to managing governance and your security program? Setting the right targets for your organization is crucial, especially with recent events like the new SEC reporting regulations underscoring the need for informed disclosures.

Bitsight's Peer Comparison capabilities, Peer Analytics and Benchmarking, are your compass to navigate this landscape. These tools empower you to gain a precise understanding of how your performance stacks up. You can seamlessly share your program's performance with key stakeholders, including the Board, harness it as an independently validated differentiator, and wield it as a pivotal point of disclosure to paint a vivid picture of your cybersecurity posture. Let's unlock the potential together. Security Performance Management (SPM) empowers security leaders to get there.

Key Use Cases

Board Reporting: Transparently present your cybersecurity program's performance, with context.

Drive Revenue: Leverage independently validated differentiators to stand out in the competitive landscape.

Regulations & Disclosure: Go beyond compliance, such as the new SEC regulations, by setting informed targets and disclosing cybersecurity posture effectively.

Benefits

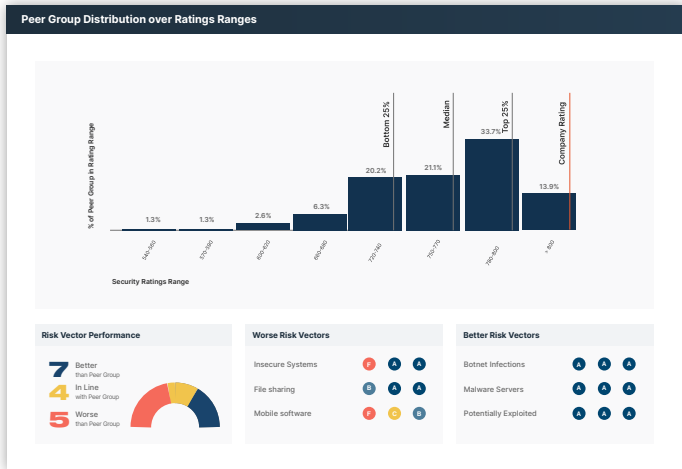

- 1**
Communicate easily & instill confidence
- 2**
Set meaningful governance targets
- 3**
Inform investment and prioritization

With Bitsight SPM, we have a single, reliable source of truth regarding what our digital footprint is and how our cybersecurity posture stacks up against competitors.

Peer Analytics

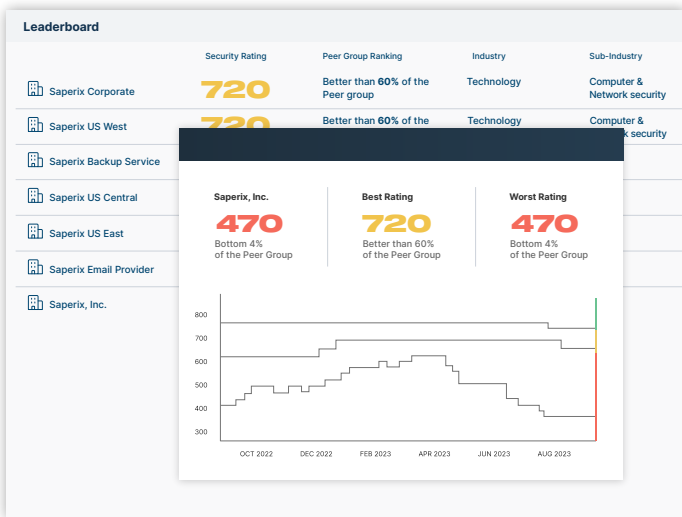

Gain context on your organization's cybersecurity posture by comparing to a meaningful set of peers. Compare against organizations of similar size, industry, employee count, resources, and even financial indexes like the S&P 500 or FTSE 100, providing a realistic security standard to aim towards.

- Set meaningful performance targets based on relative performance
- Gain insights to prioritize risk activities
- Instill confidence with key stakeholders by showing comparative outcomes

96% of security professionals in a recent Bitsight webinar poll say independent benchmarking could strengthen their message to shareholders

Benchmarking Subscriptions

Objectively measure, compare, and mitigate risk against meaningful peer groups.

- Use objective, data-driven ratings to measure impact
- Compare security performance against your industry, peers, and competitors
- Identify and remediate harmful security issues
- Make educated investment decisions to reduce risk

Bitsight is a cyber risk management leader transforming how companies manage exposure, performance, and risk for themselves and their third parties. Companies rely on Bitsight to prioritize their cybersecurity investments, build greater trust within their ecosystem, and reduce their chances of financial loss. Built on over a decade of technological innovation, its integrated solutions deliver value across enterprise security performance, digital supply chains, cyber insurance, and data analysis.
