

MITIGATING VULNERABILITIES ACROSS YOUR PORTFOLIO OF POLICYHOLDERS

Policyholder Vulnerability Detection & Response

Take action on zero days and major security events with speed and precision.

The new Bitsight for Cyber Insurance feature, Policyholder Vulnerability Detection & Response, empowers Insurers to assess and mitigate Insured's exposure during major security events, quickly and effectively.

Quickly access comprehensive views of vulnerabilities across your portfolio

Mitigate potential claims and losses to the policyholders across your portfolio

Provide your Insureds with exposure evidence and action plans to remediate risk to their organization —and your portfolio

Prioritize, scale, and track policyholder outreach more efficiently with built-in questionnaires and workflows through the Bitsight application

Utilize new API endpoints to efficiently integrate vulnerability exposure information into your systems

Benefits

1

Monitor vulnerability impacts across your portfolio

2

Remediate risk and exposure more quickly

3

Mitigate potential losses to your policyholders

Bitsight is a cyber risk management leader transforming how companies manage exposure, performance, and risk for themselves and their third parties. Companies rely on Bitsight to prioritize their cybersecurity investments, build greater trust within their ecosystem, and reduce their chances of financial loss. Built on over a decade of technological innovation, its integrated solutions deliver value across enterprise security performance, digital supply chains, cyber insurance, and data analysis.
