

BitSight Vendor Risk Management

Simplified Vendor Risk Management at Scale

As digital transformation accelerates and digital supply chains expand, organizations face challenges in managing and mitigating third-party cyber risk. Effective vendor risk management requires a scalable process, reliable data, and broad visibility that works across the vendor lifecycle.

A SCALABLE SOLUTION FOR END-TO-END THIRD-PARTY RISK MANAGEMENT (TPRM)

Proactively manage the increasingly complex third-party cyber risk environment by automating vendor risk management throughout the third-party lifecycle. With BitSight Vendor Risk Management, your team can:

Manage Risk With increased Visibility

Single risk dashboard, a real-time overview of risk assessments and performance.

Ensure Vendor Risks Fit Organization's Appetite

Customize your cyber risk workflow to prioritize your critical and high-risk vendors.

Automate Vendor Assessments

Retire manual processes that allow for inefficiency and human error.

Consult BitSight Security Ratings

First-to-market continuous monitoring to validate vendor questionnaire responses with objective evidence.

Strengthen the Vendor Evaluation Process

Access to 20,000+ vendor security profiles and multiple data feeds.

Collaborate Without Hesitation

Interact with vendors as frequently as you need to assess and remediate risks, without additional cost.

TRUSTED RESULTS FROM A TRUSTED PROVIDER

Scale your vendor risk management program with BitSight VRM to drive strategic decisions across your organization and collaborate confidently with your vendors.

Powered by the world's leading provider of cybersecurity ratings and analytics, BitSight VRM is an intuitive tool that helps organizations save time and resources for what matters the most: reducing program risk and increasing business value.
